About DGET

The field of Green Energy Technology (GET) encompasses a continuously evolving group of methods, materials and processes from environmentally benign techniques for generating energy to its minimal utilization for maximal production of end materials, and utilization of waste products when generated. This is being addressed through Sustainable Development concepts.

In the year 2010, a Centre for Green Energy Technology was established at the Pondicherry University to cater the quality human resource in the field of renewable and clean energy. It offers M.Tech. Green Energy Technology and Ph.D. in the field of renewable energy and related subjects. The Centre has been chosen as Centre of Excellence by MNRE, and has MNRE scholarship to research and PG programme. Besides it receives eight fully funded scholarship to SAARC country students supported by South Asia Foundation – India. In ten years of its academic journey tirelessly put forth by its faculty and students, it has grown to the level of UGC notified Department in the year 2020. The Department of Green Energy Technology christened in the year 2020, is constantly evolving and excelling in various fields of energy technologies, both in research and product development.

About the Conference

Two days national conference on *Recent Trends in Green Energy Technologies* is designed to deliberate on research and
